Curriculum

The complete UMedic package consists of four series.
Each series includes five patient-centered programs that can stand alone or link to Harvey.

First series

Emphasizes pathophysiology and bedside skills

- The Normal Patient
- Aortic Stenosis
- Aortic Regurgitation
- Mitral Stenosis
- Mitral Regurgitation

Second series

Emphasizes common management problems

- Angina Pectoris
- Acute Inferior infarction
- Acute Anterior infarction
- Cardiomyopathy
- Hypertension

Third series

Adds additional congenital & acquired diseases

- Atrial Septal Defect
- Acute Pericarditis
- Primary Pulmonary Hypertension
- Acute Mitral Regurgitation
- Hypertrophic Obstructive Cardiomyopathy

Fourth series

Emphasizes pediatric diseases

- Innocent Murmur
- Mitral Valve Prolapse
- Ventricular Septal Defect
- Coarctation of the Aorta
- Tetralogy of Fallot

Content

Each program includes the entire patient encounter. The student is guided by an instructor who provides explanations, feedback and remediation.

History

Bedside findings

Presented by an instructor using Harvey

- General appearance
- Blood pressure
- Arterial and venous pulses
- Precordial movements
- Cardiac and pulmonary auscultation

Diagnosis

Pathophysiology

Laboratory Data

- CBC & blood chemistries
- Electrocardiograms
- X-rays
- Real-time echo Dopplers
- Other imaging techniques and angiograms

Treatment

- This component features videos of interventional therapy and surgery

Discussions

- Key teaching points and remediation
- Case reviews by authoritative cardiologist
